***Owners Note:** This product has been accidently “under-cooked”. While its exterior surface looks acceptable, it’s interior will retain a small amount of loose resin. We make every effort to remove it, but 100% removal is impossible. For this reason, we do not recommend that this item be given to any animal that is capable of penetrating it. It is also important to note that if any of this resin is accidently ingested, our resin is a very fine particle (35 mesh) and is completely food-grade.
